MODULES A TO I

# Which module should you start with?

Every module is a complete unit of 4 or 5 lessons that ends in a performance. You can start with any of them, and you don't need a STEM or dance background. Use these three questions to pick the one that fits your students and your space.

### 1. How old are your students?

Grades 6 to 10: any module works.

Grades 3 to 5: start with **C**. It's built for younger grades.

Grades 11 to 12: any module, with the stretch notes in each guide.

### 2. How much tech do you have?

One screen for you: **D, E or H.**

A device per pair for one lesson: **C or I.**

A computer per student or pair: **A, B, F or G.**

### 3. What lights your students up?

AI and tech: **A, D, I**

Social media: **B**

Music, sound and physics: **C, G**

Climate and justice: **E, F**

Design and fashion: **H**

## All nine at a glance

| MODULE | NAME | THEME | GRADES | LENGTH | TECH |
|---|---|---|---|---|---|
| **A** | Afrobeats & AI | AI and music | 6 to 10 | 4 lessons | Hands-on tech |
| **B** | Reggaeton, Algorithms & Virality | Social media | 6 to 10 | 4 lessons | Hands-on tech |
| **C** | Rhythm, Rotation & Radical Moves | Physics and music | 5 to 8 (or 3 to 4) | 5 lessons | Mixed |
| **D** | Break Dance Machine | AI and hip-hop | 6 to 10 | 4 lessons | Low-tech |
| **E** | Carbon Footstep | Climate | 6 to 10 | 5 lessons | Low-tech |
| **F** | No Breath, No Justice | Health and justice | 6 to 10 | 4 lessons | Hands-on tech |
| **G** | Speakerboxx | Sound and engineering | 6 to 10 | 4 lessons | Hands-on tech |
| **H** | Dance Shoe Design | Design and fashion | 6 to 10 | 4 lessons | Low-tech |
| **I** | ChoreoGPT | AI and storytelling | 6 to 10 | 4 lessons | Mixed |

**Not sure?** If tech is tight, start with D, E or H. If your students are younger, start with C. Lessons run about 90 minutes and split into two 45-minute blocks.

MODULES A TO E

# The modules, one by one

## A MODULE — Afrobeats & AI

4 lessons | Hands-on tech

Music, Movement & Machine Learning

**AI is a co-pilot, not an autopilot.**

**STEM**
AI basics, prompt engineering, training a model, AI bias

**DANCE**
Afrobeats rhythms: polyrhythm and clave

**FINALE**
A crew dance to a music track students create with AI

**YOU NEED**
A computer per student or pair, internet, headphones. Ask IT to unblock the AI tools.

## B MODULE — Reggaeton, Algorithms & Virality

4 lessons | Hands-on tech

Decoding the Feed, Designing the Future

**Someone designed the algorithms in your feed, and someone can redesign them.**

**STEM**
Recommendation algorithms, engagement signals, data privacy

**DANCE**
Reggaeton and the dembow rhythm

**FINALE**
A TikTok-ready crew video with a message about algorithms

**YOU NEED**
A computer per student or pair, Canva, a device that can film, and media permission.

## C MODULE — Rhythm, Rotation & Radical Moves

5 lessons | Mixed

Hoop Dancing & the Physics of Percussion

**Movement is science in action.**

**STEM**
Centripetal force, friction, sound waves, engineering design

**DANCE**
Hula hoop routines and percussion

**FINALE**
A performance with homemade instruments and hula hoop routines

**YOU NEED**
Hula hoops in 3 sizes, cans or containers, and a device with a microphone per pair for one lesson.

## D MODULE — Break Dance Machine

4 lessons | Low-tech

Where Breaking Meets Machine Learning

**Machine learning is something a person designs, by giving a computer examples.**

**STEM**
Machine learning, training data, image classification, bias

**DANCE**
Breaking and its cultural roots

**FINALE**
A Breaking Battle cypher where crews show their three trained moves

**YOU NEED**
One facilitator laptop with a webcam and a shared screen. Works without a camera, too.

## E MODULE — Carbon Footstep

5 lessons | Low-tech

Step Dance for the Climate Generation

**Climate change is about who gets to take up space.**

**STEM**
Carbon footprint, reading data, individual vs. systemic action

**DANCE**
Step, from HBCU and Divine Nine traditions

**FINALE**
An original step routine with a student-written climate chant

**YOU NEED**
One screen for videos, open floor space and a speaker. Offline by design.

MODULES F TO I

# The modules, one by one

F MODULE

## No Breath, No Justice

4 lessons | Hands-on tech

Respiratory Science, Environmental Justice & Advocacy

**The air quality in your neighborhood is not an accident.**

**STEM**
The respiratory system, experiments and data, the Air Quality Index

**DANCE**
Just Dance-inspired choreography

**FINALE**
A crew advocacy routine performed for the class

**YOU NEED**
A computer per student or pair, headphones, and plastic bottles for a lung model.

G MODULE

## Speakerboxx

4 lessons | Hands-on tech

Sound You Can Feel. Sound You Can Build.

**Sound is vibration, and vibration is movement.**

**STEM**
Frequency, amplitude, electromagnetic induction, building a speaker

**DANCE**
Dance traditions from around the world

**FINALE**
A homemade paper plate speaker, plus a movement showcase

**YOU NEED**
A computer per student or pair, a large speaker, and magnets and copper wire ordered a week ahead.

H MODULE

## Dance Shoe Design

4 lessons | Low-tech

Engineering, Empathy & the Sole of Dance

**Every shoe is an engineering solution.**

**STEM**
Material science, friction, design thinking, prototyping

**DANCE**
Movement demos of each shoe design

**FINALE**
A dance shoe prototype or blueprint, pitched in the Sole Showcase

**YOU NEED**
A facilitator device and projector, craft supplies, and donated shoes if you have them.

I MODULE

## ChoreoGPT

4 lessons | Mixed

AI, Choreography & the Stories Only You Can Tell

**AI is not the artist. You are.**

**STEM**
Human-computer interaction, prompt engineering

**DANCE**
Choreography tools: motif, canon, ABA form

**FINALE**
Crew choreography shaped with ChoreoGPT, performed in the Story in Motion Showcase

**YOU NEED**
A facilitator device and projector, student devices with cameras, and ChoreoGPT teacher access.

**Ready to start?** Open the module in Disco and finish its Start Here items. Its lessons unlock after that. Questions? Bring them to Club Support Hours or email partnerships@stemfromdance.org.
